

**BOBCAT<sup>®</sup> MACHINE IQ WIRELESS COMMUNICATIONS** enhances the support we are able to provide for your Bobcat machine – enabling a stronger partnership to maximize your uptime. With the help of durable electronics built into Bobcat equipment, machine data is made available to our machine monitoring specialist, which enables us to increase the level of service that we can provide to you.

### What is Machine IQ?

Machine IQ uses electronic communications technology to keep you connected to your machine's status at any time, from a computer or mobile device. Your Bobcat machine includes a device that enables you and your dealer to monitor machines remotely for:

- Unplanned maintenance
- Planned maintenance
- Machine security
- Reporting and analytics
- Basic telematics

### What information can I see?

Via your Bobcat Owner Portal account at [my.Bobcat.com](http://my.Bobcat.com), you can access your machine information 24/7. This enables you to watch your machines more closely and proactively to perform service that maximizes productivity and the life of your machine. Standard with all Bobcat connected machines, you have access to:

- GPS location and history
- Hours
- Fuel level
- Customer asset name
- Maintenance progress tracking

*Advanced health and security packages available.*

### What information is transmitted?

To provide the Machine IQ service, your equipment transmits machine location, operating hours and fault codes to you and your dealership:

- Each time it is started/stopped
- Every 20 minutes while running
- Each time a critical code occurs
- When the machine is moving and not running (trailing mode)

The data is sent via satellite or cellular communication, at no charge to you. Service is provided standard as part of your Bobcat equipment purchase.

## BOBCAT MACHINE DATA SUBSCRIPTIONS

When you purchase a connected Bobcat machine, you have free access to the basic Machine IQ package, foundational machine data that helps you manage your fleet effectively. Simply register your machine at [my.Bobcat.com](http://my.Bobcat.com) using your serial number.

If you wish to upgrade your account to include more features, Machine IQ health and security package is a great solution. Contact your Bobcat dealer for pricing and subscription details.

### Basic Telematics

Every Bobcat Owner Portal has access to basic machine data. Use this information as a foundation for effective fleet management.

### GPS Location and History

Track your machine's live location and map every point in its history by latitude and longitude and monitor other important data.

### Operating Hours

Time is money; keep track of exactly how many hours your engines have been running.

### Live Fuel Levels

Get up-to-the-minute, color-coded fuel information for your equipment.

### Maintenance Interval Tracking

Stay on top of maintenance; track your assets' regular and custom maintenance cycles and stay prepared with instructions for each interval.

### How do I get connected?

#### Talk to your Bobcat dealer to:

1. Assist you in creating the customer admin and account for your company
2. Register your assets to your account in the Bobcat Owner Portal
3. Assist you in determining which subscription bundle is best for you
4. Train you on the Bobcat Owner Portal

### Advanced Health and Security Upgrade

Upgrade your account and watch your machines even more closely, and proactively. Perform service to maximize productivity and the life of your machine. Subscribe to the advanced health and security package for more robust machine data, plus the convenience of proactive email notifications about your equipment.

#### Basic Telematics

All basic telematics are included with your subscription, including GPS location and history, operating hours, live fuel levels and maintenance interval tracking.

#### Fault Code Notifications and Troubleshooting

Take the guesswork away when diagnosing machine issues. When your machine generates a fault code, you can instantly receive clear descriptions and troubleshooting steps.

#### Geofence Creation and Breach Notifications

Take control of your assets; set up custom boundaries and receive notifications the moment your equipment moves outside your defined operation area.

#### Curfew Creation and Breach Notifications

Set custom working days and hours to receive alerts if the machine's engine is started outside your defined limits.

#### Utilization Reports

Work smarter. You can enhance the efficiency of your equipment with custom reports on working hours, idle hours, and fuel usage by day or hour.

#### Subscribe to Email Notifications and Alerts

When you subscribe to the advanced health and security package, we can send you timely email notifications that help you improve machine management and maintenance. You'll receive:

- Fault code alerts
- Maintenance reminders
- Security information
  - Geofence
  - Curfew
  - Idle time vs. working time
  - Fuel usage
